EDUCATION

Anna University, Chennai

August 2020 - July 2024

Bachelor of Technology in Information Technology , CGPA: 7.2/10

Senior Secondary Examination, Bihar Board

July 2019 - June 2020

CAREER OBJECTIVE

To work for an organization that provides me the opportunity to improve my skills and knowledge, allowing me to grow along with the organization's objectives.

WORK EXPERIENCE

FluxusForge (Backend Developer)

January 2026 - Present

- Managing both backend and frontend development using the MERN stack to keep the entire system running smoothly.
- Developing secure REST APIs, implementing error handling, and building backend logic for financial products and loan systems.
- Integrating APIs with the Next.js frontend, performing data validation, and ensuring a fast and responsive user experience.

Programming Pathshala(internship)

October 2024 - september 2025

- Developed and optimized the company's main landing page and multiple branch-specific landing pages using Next.js and Tailwind CSS, significantly improving user engagement and page performance.
- Designed and implemented multiple product landing pages, ensuring responsive UI, SEO-friendly structure, and faster load times.
- Contributed to frontend development tasks including reusable component creation, UI enhancements, and performance optimization.
- Worked on the Square Foundation NGO project, contributing to the development of features like scholarship application forms, user authentication, and admin panel using the MERN stack.

PROJECTS

Programming Pathshala Landing Pages (Next.js + Tailwind CSS)

- Developed the main landing page and multiple branch-specific pages, implementing responsive design and interactive UI components.
- Engineered reusable frontend modules with Tailwind CSS, ensuring pixel-perfect design consistency and optimized rendering across all devices.
- Technologies used: React.js, Next.js, Tailwind CSS, HTML, JavaScript.
- **Live Link:** <https://programmingpathshala.com>

Square Foundation (MERN Stack)

- Designed and developed a platform to offer scholarships to underprivileged students, empowering them to pursue higher education despite financial challenges.
- Implemented user authentication, scholarship application process, and an admin panel for managing applications.
- Built using MongoDB, Express.js, React.js, and Node.js (MERN Stack).
- **Live link:** square-foundation-frontend.vercel.app

TECHNICAL STRENGTHS

Programming Languages	C++, JavaScript (ES6+)
Web Development	HTML5, CSS, Tailwind CSS, React.js, Next.js
Backend Development	Node.js, Express.js
Database	MongoDB
Testing	Jest (Unit Testing)
Tools	Git, GitHub, VS Code, Postman

ACHIEVEMENTS / CERTIFICATIONS

- Completed “Full Stack Web Development” certification from Programming Pathshala.
- Built and deployed multiple live projects demonstrating MERN stack and frontend expertise.
